WORK EXPERIENCE

YesLiberia, Inc   **Jan 2025 - Present**
Web Developer (Volunteer, Remote)   *Monrovia, Liberia*

- Managed the installation, configuration, and customization of plugins to meet specific website functionality and user experience requirements.
- Conducted regular maintenance, updates, and troubleshooting to ensure optimal website performance.

Walker Advanced Manufacturing Innovation Centre   **May 2024 - Jan 2025**
Computer Programmer Research Assistant   *Welland, ON*

- Configured, upgraded, and dockerized PHP-based CRM software (SuiteCRM) for **Kubernetes** deployment, ensuring compatibility with custom modules, and automating installation with **Bash** and **GitLab CI** scripts.
- Developed **Python** scripts with **GeoPandas** and **SciPy** to detect and address residual data noise in soil property maps, improving processing efficiency and eliminating manual analysis by researchers.
- Resolved critical issues in an internal **ETL** data migration tool, ensuring seamless migration from historical databases.
- Collaborated with the research team of a partner company to develop and refine methods for detecting artefacts in data, using **gradient analysis** and **edge detection algorithms** (**OpenCV**) on images generated on the dataset using **MatPlotLib** to identify anomalies efficiently.
- Produced comprehensive documentation of data analysis methodologies and findings supporting the research team's decision-making and implementation efforts

Welland Minor Baseball League - Community Sponsored Project   **Jan 2024 - May 2024**
Developer / Team Lead   *Welland, ON*

- Led a team in developing a responsive web application using **C#**, **ASP.NET**, **HTML**, **CSS/Bootstrap**, and **JavaScript** to streamline game tracking, scorekeeping, and player statistics for the Welland Minor Baseball Association.
- Oversaw the implementation of the **MVC design pattern**, promoting clear separation of concerns and efficient management of models, views, and controllers
- Managed version control with **GitHub**, reviewing and merging code submissions to maintain code quality and consistency across the project.

PERSONAL PROJECTS

Thesis Contribution - Web Portfolio Development
A History of Misrepresentation; Centering Trans-Feminine Individuals Within Craniofacial   *(AWS Face Rekognition, CompreFace,*
Approximations by Taylor Violet Ross   *Astro.build)*
https://www.dundee.ac.uk/masters-showcase/2024/taylor-violet-ross
taylorrenegade.ca

- Developed a mobile-responsive static portfolio site using the JavaScript framework **Astro** for Taylor Violet Ross, deployed on **Azure Static Sites** for fast and reliable hosting.
- Assisted in data collection and analysis, contributing to project insight and in decision-making for dissertation.
- Leveraged **facial recognition APIs** to compare and quantify the consistency of craniofacial approximations of the same skull, examining how different standards proposed by the author affected the results.

Snake Clone UWP Game
https://github.com/sorphil/sanic-uwp/   *(C#, Universal Windows Platform)*

- Developed a Snake Clone game using the **Universal Windows Platform (UWP) with C#**, featuring an interactive and engaging user interface.
- Utilized game loop mechanics and input handling to replicate classic Snake gameplay, gamepad and keyboard controls for an optimal user experience across devices.

To-Do Web Application
https://github.com/sorphil/todolist-web   *(JavaScript, CSS3, HTML5, Python, Django/Django REST)*

- Designed a web application using vanilla **JavaScript/HTML/CSS** as the frontend and storing data and handling authentication and sessions using **Django-REST** framework as the backend (hosted using the basic service provided by Python Anywhere)

EDUCATION

Niagara College   **Jan. 2023 - Jan 2025**
Computer Programming and Analysis Co-op   *Welland, ON*

- GPA: 3.7/4.0
- President's Honour Roll for three consecutive terms
- **Relevant Courses:** Data Warehousing, Big Data Programming & Reporting, Network Security, Operating System Administration

TECHNICAL SKILLS

Skills

- **Languages:** Python, C#, Javascript, HTML/CSS3, Java
- **Libraries & Frameworks:** Numpy, MatPlotLib, SciPy, Pandas, GeoPandas, Django/Django-REST, ASP.NET, .NET, REACT, Sass
- **Tools & Databases:** Git, Linux, SSIS, Shell/Bash Scripting, PowerBI, Docker, Kubernetes, JWT, CI/CD, SQL Server, Sqlite, MongoDB

OTHER WORK EXPERIENCE

Aramark - Brock University   **Feb. 2023 - Present**
Food Service Worker   *St. Catharines, ON*

- Trained across different campus food locations(Tim Hortons, Starbucks, Pita Pit, etc.), demonstrating adaptability and quick learning.
- Ensured and upheld high standards of quality with attention to detail
- Provided friendly and efficient customer service with strong interpersonal skills.
